EDUCATION

- Rheinland-Pfälzische Technische Universität (RPTU) Kaiserslautern-Landau** Kaiserslautern, Germany
M.Sc. in Computer Science; Specialization: Software Engineering and Intelligent Systems; CGPA: 2.0 Oct 2025 – Expected 2027
- Visvesvaraya Technological University** Karnataka, India
B.E. in Computer Science; CGPA: 1.9 (German Equivalent) Dec 2021 – Jun 2025

SKILLS

- Programming Languages:** Python, TypeScript, JavaScript, SQL
- Frontend Development:** React, Tailwind CSS
- Backend and Data:** FastAPI, REST APIs, PostgreSQL, Supabase, pgvector
- AI & Automation:** AI Agents, Workflow Automation, RAG, LLM Applications, Multi-Agent Systems, Embeddings
- Tools and Platforms:** Git, GitHub, Docker, Linux, n8n, Cursor, Claude Code, GitHub Copilot

EXPERIENCE

- Targetgrid** India
Software Development Intern Sep 2024 – Feb 2025
 - Built Python automation workflows to collect, process, and organize lead-generation data from multiple online sources.
 - Integrated third-party REST APIs into automated workflows, improving data collection efficiency and reducing manual operational effort.
 - Contributed to the development and maintenance of a React-based web application, implementing features and resolving bugs.
- AiEnsured** Bengaluru, India
Machine Learning Intern Nov 2023 – Jan 2024
 - Trained and evaluated computer vision models for industrial data classification tasks using Google Teachable Machine.
 - Conducted model testing, validation, and performance analysis, documenting results for internal evaluation workflows.
- Jyothy Institute of Technology** Bengaluru, India
Technical Teaching Assistant Jan 2023 – Mar 2023
 - Delivered Python programming workshops and conducted code reviews on object-oriented programming (OOP) principles for a cohort of 30+ students.

PROJECTS

- Lumen – AI-Powered CMS Platform**
Tech Stack: Python, FastAPI, Groq, PostgreSQL, Supabase, pgvector, Redis, Celery, React, TypeScript
 - Built and deployed a full-stack CMS platform that transforms long-form articles into swipeable knowledge cards through a multi-stage agent pipeline.
 - Implemented Retrieval-Augmented Generation (RAG) using embeddings, semantic retrieval, and pgvector-based vector search for contextual article chat.
 - Developed FastAPI services, React interfaces, and asynchronous processing workflows supporting AI generation, content publishing, analytics, and content management.
- Effortless – Authentic Work Verification Platform**
Tech Stack: React, Vite, TypeScript, Tailwind CSS, PostgreSQL, Supabase
 - Built a full-stack SaaS platform that verifies document authenticity and links cryptographic proof to generated work without storing document content.
 - Implemented authentication, database integration, and end-to-end application workflows using React, TypeScript, PostgreSQL, and Supabase.
- MedConnect – Automated Medicine Dispensing System (Patent Granted)**
Tech Stack: Arduino, ESP8266, C++, PID Control, Python
 - Developed an IoT-based medicine dispensing system integrating embedded software, device communication, and automated dispensing workflows.
 - Granted Indian Patent No. 710119106 and secured institutional funding for further development.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Founded the Entrepreneurship Development Club (EDC), organizing startup and technical initiatives for students.
- Led a 10-member robotics team at the Technoxian International Robotics Contest, developing a PID-controlled line-following robot.
- Secured 3rd place at JITHACK 2023 for developing a mobile-controlled robotic arm using ESP8266.

ADDITIONAL INFORMATION

- Languages:** English (C1), German (A2 – currently pursuing B1)
- Work Authorization:** Eligible to work in Germany as a Werkstudent and intern.
